

*Spoken Karaim CD
Beta distribution*

Dear colleague

We are pleased to send you a pre-publication version of the Spoken Karaim CD-ROM. It has been sent to about 50 selected people worldwide who have an interest in Karaim culture, endangered languages, and/or interactive language resources.

We are asking your assistance to make sure that the Spoken Karaim CD will be a useful resource for the Karaim community and for those interested in such endangered languages. Therefore, we request you to view the CD and to send us your comments using the feedback forms we have provided (paper copy or in the Help folder on the CD). We especially ask you to tell us about any problems or inadequacies that you find.

The CD will run on Windows 95-98 computers with at least 166MHz CPU and 32 MB RAM.

You can run the program directly off the CD, or copy it to your computer. See the Help file
